## **Data Structures and Algorithms Questions:**

| Topic: | <u>Problem:</u>  | Done [yes or no] |
|--------|--|------------------|
|        |  | <->              |
| Array  | Reverse the array  | <->              |
| Array  | Find the maximum and minimum element in an array                                     | <->              |
| Array  | Find the "Kth" max and min element of an array                                       | <->              |
|        | Given an array which consists of only 0, 1 and 2. Sort the array without using any   |                  |
| Array  | <u>sorting algo</u>  | <->              |
| Array  | Move all the negative elements to one side of the array                              | <->              |
| Array  | Find the Union and Intersection of the two sorted arrays.                            | <->              |
| Array  | Write a program to cyclically rotate an array by one.                                | <->              |
| Array  | find Largest sum contiguous Subarray [V. IMP]  | <->              |
| Array  | Minimise the maximum difference between heights [V.IMP]                              | <->              |
| Array  | Minimum no. of Jumps to reach end of an array  | <->              |
| Array  | find duplicate in an array of N+1 Integers   | <->              |
| Array  | Merge 2 sorted arrays without using Extra space.                                     | <->              |
| Array  | Kadane's Algo [V.V.V.V IMP]  | <->              |
| Array  | Merge Intervals  | <->              |
| Array  | Next Permutation   | <->              |
| Array  | Count Inversion  | <->              |
| Array  | Best time to buy and Sell stock  | <->              |
| Array  | find all pairs on integer array whose sum is equal to given number                   | <->              |
| Array  | find common elements In 3 sorted arrays  | <->              |
| Array  | Rearrange the array in alternating positive and negative items with O(1) extra space | <->              |
| Array  | Find if there is any subarray with sum equal to 0                                    | <->              |
| Array  | Find factorial of a large number   | <->              |
| Array  | find maximum product subarray  | <->              |

| Array  | Find longest coinsecutive subsequence   | <-> |
|--------|---|-----|
|        | Given an array of size n and a number k, fin all elements that appear more than " n/k " |     |
| Array  | <u>times.</u>   | <-> |
| Array  | Maximum profit by buying and selling a share atmost twice                               | <-> |
| Array  | Find whether an array is a subset of another array                                      | <-> |
| Array  | Find the triplet that sum to a given value  | <-> |
| Array  | <u>Trapping Rain water problem</u>  | <-> |
| Array  | Chocolate Distribution problem  | <-> |
| Array  | Smallest Subarray with sum greater than a given value                                   | <-> |
| Array  | Three way partitioning of an array around a given value                                 | <-> |
| Array  | Minimum swaps required bring elements less equal K together                             | <-> |
| Array  | Minimum no. of operations required to make an array palindrome                          | <-> |
| Array  | Median of 2 sorted arrays of equal size   | <-> |
| Array  | Median of 2 sorted arrays of different size   | <-> |
|        |   | <-> |
|        |   | <-> |
| Matrix | Spiral traversal on a Matrix  | <-> |
| Matrix | Search an element in a matriix  | <-> |
| Matrix | Find median in a row wise sorted matrix   | <-> |
| Matrix | Find row with maximum no. of 1's  | <-> |
| Matrix | Print elements in sorted order using row-column wise sorted matrix                      | <-> |
| Matrix | Maximum size rectangle  | <-> |
| Matrix | Find a specific pair in matrix  | <-> |
| Matrix | Rotate matrix by 90 degrees   | <-> |
| Matrix | Kth smallest element in a row-cpumn wise sorted matrix                                  | <-> |
|        |   | ` ` |

String Reverse a String

<->

| String | Check whether a String is Palindrome or not  |     |
|--------|--|-----|
| String | Find Duplicate characters in a string  | <-> |
| String | Why strings are immutable in Java?   | <-> |
| String | Write a Code to check whether one string is a rotation of another                  | <-> |
| String | Write a Program to check whether a string is a valid shuffle of two strings or not | <-> |
| String | Count and Say problem  | <-> |
|        | Write a program to find the longest Palindrome in a string.[Longest palindromic    |     |
| String | Substring]   | <-> |
| String | Find Longest Recurring Subsequence in String                                       | <-> |
| String | Print all Subsequences of a string.  | <-> |
| String | Print all the permutations of the given string                                     | <-> |
| String | Split the Binary string into two substring with equal 0's and 1's                  | <-> |
| String | Word Wrap Problem [VERY IMP].  | <-> |
| String | EDIT Distance [Very Imp]   | <-> |
| String | Find next greater number with same set of digits. [Very Very IMP]                  | <-> |
| String | Balanced Parenthesis problem.[Imp]   | <-> |
| String | Word break Problem[ Very Imp]  | <-> |
| String | Rabin Karp Algo  | <-> |
| String | KMP Algo   | <-> |
| String | Convert a Sentence into its equivalent mobile numeric keypad sequence.             | <-> |
| String | Minimum number of bracket reversals needed to make an expression balanced.         | <-> |
| String | Count All Palindromic Subsequence in a given String.                               | <-> |
| String | Count of number of given string in 2D character array                              | <-> |
| String | Search a Word in a 2D Grid of characters.  | <-> |
| String | Boyer Moore Algorithm for Pattern Searching.                                       | <-> |
| String | Converting Roman Numerals to Decimal   | <-> |
| String | <u>Longest Common Prefix</u>   | <-> |
| String | Number of flips to make binary string alternate                                    | <-> |
| String | Find the first repeated word in string.  | <-> |
|        |  | <-> |

| String              | Minimum number of swaps for bracket balancing.  |     |
|---------------------|---|-----|
| String              | Find the longest common subsequence between two strings.                                  | <-> |
| String              | Program to generate all possible valid IP addresses from given string.                    | <-> |
| String              | Write a program tofind the smallest window that contains all characters of string itself. | <-> |
| String              | Rearrange characters in a string such that no two adjacent are same                       | <-> |
| String              | Minimum characters to be added at front to make string palindrome                         | <-> |
| String              | Given a sequence of words, print all anagrams together                                    | <-> |
| String              | Find the smallest window in a string containing all characters of another string          | <-> |
| String              | Recursively remove all adjacent duplicates  | <-> |
| String              | String matching where one string contains wildcard characters                             | <-> |
| String              | Function to find Number of customers who could not get a computer                         | <-> |
| String              | Transform One String to Another using Minimum Number of Given Operation                   | <-> |
| String              | Check if two given strings are isomorphic to each other                                   | <-> |
| String              | Recursively print all sentences that can be formed from list of word lists                | <-> |
|                     |   |     |
| Searching & Sorting | Find first and last positions of an element in a sorted array                             | <-> |
| Searching & Sorting | Find a Fixed Point (Value equal to index) in a given array                                | <-> |
| Searching & Sorting | Search in a rotated sorted array  | <-> |
| Searching & Sorting | square root of an integer   | <-> |
| Searching & Sorting | Maximum and minimum of an array using minimum number of comparisons                       | <-> |
| Searching & Sorting | Optimum location of point to minimize total distance                                      | <-> |
| Searching & Sorting | Find the repeating and the missing  | <-> |
|                     | find majority element   | <-> |
|                     | Searching in an array where adjacent differ by at most k                                  | <-> |
|                     | find a pair with a given difference   | <-> |
|                     | find four elements that sum to a given value  | <-> |
| Searching & Sorting | maximum sum such that no 2 elements are adjacent  | <-> |
| Searching & Sorting | Count triplet with sum smaller than a given value   | <-> |
|                     |   | <-> |

| Searching & Sorting | merge 2 sorted arrays  |     |
|---------------------|--|-----|
| Searching & Sorting | print all subarrays with 0 sum   | <-> |
| Searching & Sorting | Product array Puzzle   | <-> |
| Searching & Sorting | Sort array according to count of set bits                                  | <-> |
| Searching & Sorting | minimum no. of swaps required to sort the array                            | <-> |
| Searching & Sorting | Bishu and Soldiers   | <-> |
| Searching & Sorting | Rasta and Kheshtak   | <-> |
| Searching & Sorting | Kth smallest number again  | <-> |
| Searching & Sorting | <u>Find pivot element in a sorted array</u>                                | <-> |
| Searching & Sorting | <u>K-th Element of Two Sorted Arrays</u>                                   | <-> |
| Searching & Sorting | Aggressive cows  | <-> |
| Searching & Sorting | Book Allocation Problem  | <-> |
| Searching & Sorting | EKOSPOJ:   | <-> |
| Searching & Sorting | Job Scheduling Algo  | <-> |
| Searching & Sorting | Missing Number in AP   | <-> |
| Searching & Sorting | Smallest number with atleastn trailing zeroes infactorial                  | <-> |
| Searching & Sorting | <u>Painters Partition Problem:</u>   | <-> |
| Searching & Sorting | ROTI-Prata SPOJ  | <-> |
| Searching & Sorting | <u>DoubleHelix SPOJ</u>  | <-> |
| Searching & Sorting | <u>Subset Sums</u>   | <-> |
| Searching & Sorting | <u>Findthe inversion count</u>   | <-> |
| Searching & Sorting | <u>Implement Merge-sort in-place</u>                                       | <-> |
| Searching & Sorting | Partitioning and Sorting Arrays with Many Repeated Entries                 | <-> |
|                     |  |     |
|                     |  |     |
| Linked List         | Write a Program to reverse the Linked List. (Both Iterative and recursive) | <-> |
| Linked List         | Reverse a Linked List in group of Given Size. [Very Imp]                   | <-> |
| Linked List         | Write a program to Detect loop in a linked list.                           | <-> |
| Linked List         | Write a program to Delete loop in a linked list.                           | <-> |
|                     |  | <-> |

| <b>Linked List</b> | Find the starting point of the loop.  |     |
|--------------------|---|-----|
| <b>Linked List</b> | Remove Duplicates in a sorted Linked List.                                      | <-> |
| <b>Linked List</b> | Remove Duplicates in a Un-sorted Linked List.                                   | <-> |
| <b>Linked List</b> | Write a Program to Move the last element to Front in a Linked List.             | <-> |
| <b>Linked List</b> | Add "1" to a number represented as a Linked List.                               | <-> |
| <b>Linked List</b> | Add two numbers represented by linked lists.                                    | <-> |
| <b>Linked List</b> | Intersection of two Sorted Linked List.   | <-> |
| <b>Linked List</b> | Intersection Point of two Linked Lists.   | <-> |
| <b>Linked List</b> | Merge Sort For Linked lists.[Very Important]                                    | <-> |
| Linked List        | Quicksort for Linked Lists.[Very Important]                                     | <-> |
| <b>Linked List</b> | Find the middle Element of a linked list.                                       | <-> |
| <b>Linked List</b> | Check if a linked list is a circular linked list.                               | <-> |
| <b>Linked List</b> | Split a Circular linked list into two halves.                                   | <-> |
| <b>Linked List</b> | Write a Program to check whether the Singly Linked list is a palindrome or not. | <-> |
| Linked List        | Deletion from a Circular Linked List.   | <-> |
| Linked List        | Reverse a Doubly Linked list.   | <-> |
| Linked List        | Find pairs with a given sum in a DLL.   | <-> |
| Linked List        | Count triplets in a sorted DLL whose sum is equal to given value "X".           | <-> |
| Linked List        | Sort a "k"sorted Doubly Linked list.[Very IMP]                                  | <-> |
| Linked List        | Rotate DoublyLinked list by N nodes.  | <-> |
| Linked List        | Rotate a Doubly Linked list in group of Given Size.[Very IMP]                   | <-> |
| Linked List        | Can we reverse a linked list in less than O(n)?                                 | <-> |
| Linked List        | Why Quick sort is preferred for arrays and Merge Sort for Linked Lists?         | <-> |
| Linked List        | Flatten a Linked List   | <-> |
| <b>Linked List</b> | Sort a LL of 0's, 1's and 2's   | <-> |
| <b>Linked List</b> | Clone a linked list with next and random pointer                                | <-> |
| <b>Linked List</b> | Merge K sorted Linked list  | <-> |
| Linked List        | Multiply 2 no. represented by LL  | <-> |
| Linked List        | Delete nodes which have a greater value on right side                           | <-> |

| <b>Linked List</b>  | Segregate even and odd nodes in a Linked List                              | <-> |
|---------------------|--|-----|
| Linked List         | Program for n'th node from the end of a Linked List                        | <-> |
| <b>Linked List</b>  | Find the first non-repeating character from a stream of characters         | <-> |
|                     |  |     |
|                     |  |     |
| Binary Trees        | <u>level order traversal</u>   | <-> |
| Binary Trees        | Reverse Level Order traversal  | <-> |
| Binary Trees        | <u>Height of a tree</u>  | <-> |
| Binary Trees        | <u>Diameter of a tree</u>  | <-> |
| <b>Binary Trees</b> | Mirror of a tree   | <-> |
| Binary Trees        | Inorder Traversal of a tree both using recursion and Iteration             | <-> |
| <b>Binary Trees</b> | Preorder Traversal of a tree both using recursion and Iteration            | <-> |
| <b>Binary Trees</b> | Postorder Traversal of a tree both using recursion and Iteration           | <-> |
| Binary Trees        | <u>Left View of a tree</u>   | <-> |
| <b>Binary Trees</b> | Right View of Tree   | <-> |
| <b>Binary Trees</b> | <u>Top View of a tree</u>  | <-> |
| Binary Trees        | Bottom View of a tree  | <-> |
| Binary Trees        | Zig-Zag traversal of a binary tree   | <-> |
| <b>Binary Trees</b> | Check if a tree is balanced or not   | <-> |
| <b>Binary Trees</b> | <u>Diagnol Traversal of a Binary tree</u>                                  | <-> |
| Binary Trees        | Boundary traversal of a Binary tree  | <-> |
| Binary Trees        | Construct Binary Tree from String with Bracket Representation              | <-> |
| Binary Trees        | Convert Binary tree into Doubly Linked List                                | <-> |
| Binary Trees        | Convert Binary tree into Sum tree  | <-> |
| Binary Trees        | Construct Binary tree from Inorder and preorder traversal                  | <-> |
| Binary Trees        | Find minimum swaps required to convert a Binary tree into BST              | <-> |
| Binary Trees        | Check if Binary tree is Sum tree or not                                    | <-> |
| Binary Trees        | Check if all leaf nodes are at same level or not                           | <-> |
| Binary Trees        | Check if a Binary Tree contains duplicate subtrees of size 2 or more [IMP] | <-> |
| -                   | ·  | <-> |

| Binary Trees               | <u>Check if 2 trees are mirror or not</u>                         |     |
|----------------------------|---|-----|
| <b>Binary Trees</b>        | Sum of Nodes on the Longest path from root to leaf node           | <-> |
| <b>Binary Trees</b>        | Check if given graph is tree or not. [IMP]                        | <-> |
| <b>Binary Trees</b>        | Find Largest subtree sum in a tree                                | <-> |
| <b>Binary Trees</b>        | Maximum Sum of nodes in Binary tree such that no two are adjacent | <-> |
| <b>Binary Trees</b>        | Print all "K" Sum paths in a Binary tree                          | <-> |
| <b>Binary Trees</b>        | Find LCA in a Binary tree   | <-> |
| <b>Binary Trees</b>        | Find distance between 2 nodes in a Binary tree                    | <-> |
| <b>Binary Trees</b>        | Kth Ancestor of node in a Binary tree                             | <-> |
| <b>Binary Trees</b>        | Find all Duplicate subtrees in a Binary tree [IMP]                | <-> |
| <b>Binary Trees</b>        | <u>Tree Isomorphism Problem</u>                                   | <-> |
|                            |   |     |
|                            |   |     |
| <b>Binary Search Trees</b> | Fina a value in a BST   | <-> |
| <b>Binary Search Trees</b> | <u>Deletion of a node in a BST</u>                                | <-> |
| <b>Binary Search Trees</b> | Find min and max value in a BST                                   | <-> |
| <b>Binary Search Trees</b> | Find inorder successor and inorder predecessor in a BST           | <-> |
| <b>Binary Search Trees</b> | Check if a tree is a BST or not                                   | <-> |
| <b>Binary Search Trees</b> | <u>Populate Inorder successor of all nodes</u>                    | <-> |
